# An exciting time for Lismore Hospital

I was enormously proud to open the latest stage of the Lismore Base Hospital redevelopment alongside NSW Premier Mike Baird and the Minister for Health, Jillian Skinner.

**The Nationals listened to the community and we have delivered a new world-class Emergency Department.**

It contains a new medical unit, fast-track care clinic, and an expanded medical imaging service to make sure you get the medical treatment you deserve, when you need it most.

**We're also making it safer and easier to access by creating a state-of-the-art 270 space car park opposite the hospital.**

It has been my privilege to work with the community over many years to achieve this magnificent outcome.

The NSW Nationals have a proven track record in investing in health services right across the North Coast and the opening of this stage represents our commitment to healthcare in the Northern Rivers region.

**Our additional \$180 million election commitment to Lismore means the next stage is already underway** and will contain a new maternity unit, new paediatric unit and a new and expanded operating suite including nine operating theatres.

It means mothers-to-be will have the peace of mind that we have the services they expect – one less thing to worry about.

I am deeply committed as your local member to continue working with health professionals and the community to ensure we can access the best healthcare into the future.
